WHAT CIRFS DOES

- **Representational role** with European Union institutions on regulatory issues
- Defends members’ interests in fighting for **fair international trade**
- Attacks **trade barriers and distortions of competition** inside Europe
- Encourages innovation in MMF
- Promotes objective technical standards and test methods through its BISFA affiliate
- Demonstrates the **advantages** and **sustainability** of MMF
- Draws attention to the need for European institutions to take account of **international competitiveness** of European industry in setting new regulations
- Works for **scientific approach** to regulations covering chemical safety and employee health
- Provides members with **market information and analysis**
- **Links with other industry stakeholders**, upstream (chemicals) and downstream (textiles)
- **Strictly respects anti-trust rules**
- Takes **user, consumer and public interest** into account in all activities

EUROPE IS A LEADER

- 3rd world’s largest MMF producer
- World’s largest producer of polypropylene fibres
- World’s largest exporter of acrylic and cellulosic fibres
- World’s largest single-site production unit for acrylic fibres
- Global leader in polymer-modified fibres (flame-retardant, bioactive...)
- number one in clean production techniques
- Constantly investing
- Highly Innovative
